DETAILED ACTION

Allowable Subject Matter

1. Claims 25, 27-34 are allowed.
2. The following is a statement of reasons for the indication of allowable subject matter:

The prior art, U.S. Patent No. 5,937,420 to Karow, teaches a kerning method used to adjusting kerning by estimating the amplitude of each character in a kerning direction. Karow teaches analyzing character pairs for determination of kerning values; however, the reference does not explicitly teach estimating the amplitude of a character modification in a kerning direction and perturbing the outline of the character. The kerning method taught by Karow fails to suggest a modification to each character comprising perturbing the outline of the character.

In reference to independent claim 25, 28, and 32, the claimed features of estimating, independent of any characters in the set other than the pair of characters to be modified, an amplitude of the character modification in the kerning direction for each character of the pair, wherein the modification to each character comprises perturbing the outline of the character is not shown in the prior art of record and would not have been obvious to one of ordinary skill in the art to have modified the prior art of record to come up with applicant's claimed invention.

Conclusion
